## Helping You Find the Right Offshore Supplier

Since its inception, CMC International has developed a large network of quality overseas manufacturing resources with a broad range of capabilities, including but not limited to, machining, stamping, castings, plastics and finished goods such as casters. Each source is carefully matched to meet our customers' needs and requirements.

Every program or order is designed to keep costs to a minimum while providing the customer with the best possible options for pricing and inventory control.

### Process Designed to Fit Your Goals and Needs

Once CMC International receives a request for quote, we review the print to determine which of our factories are best qualified to manufacture the part at the most economical pricing. Upon receipt of pricing, we create the most efficient shipping schedule for each customer to maximize inventory and cost control. This may include shipping the annual usage at one time, quarterly shipments or even monthly releases.

**QUALITY OFFSHORE SOURCING FOR YOUR BUDGET AND MANUFACTURING NEEDS**

Communication and coordination with our customers is a central part of every process. We thoroughly discuss the most important issues with the buyers and then determine the best method for all parties involved.

We see each order through completion, providing samples as needed to make sure every customer is completely satisfied.
